INTRODUCTION

[NEXT](#)

Where did my idea come from?

In our time, there is nothing that prevents anyone from enjoying a great deal of life activity, especially at a time when services are available in an abundance and with many problems. From here and in order to provide all services to all, especially for those who need special health care.

The idea of hand helping came, which is an ambulance transport service for non-emergency and emergency cases, as well as for those who need to transport in specialized and equipped cars for people with special needs and the elderly so that they can choose the transportation center near them and determine the face. closest to him.

←There are ideas that we live for

Giving without expecting any
reward, or any thanks, has a
special advantage.

ANNE MORROW LINDBERGH

Benefits of Hand helping

Providing safe
and comfortable
transportation

Quick access, on-
call service

Equipped and prepared means of
transportation to meet the
needs with professional
specialists.

Questions / Needs

----- ^ ----- ^ ----- ^ -----

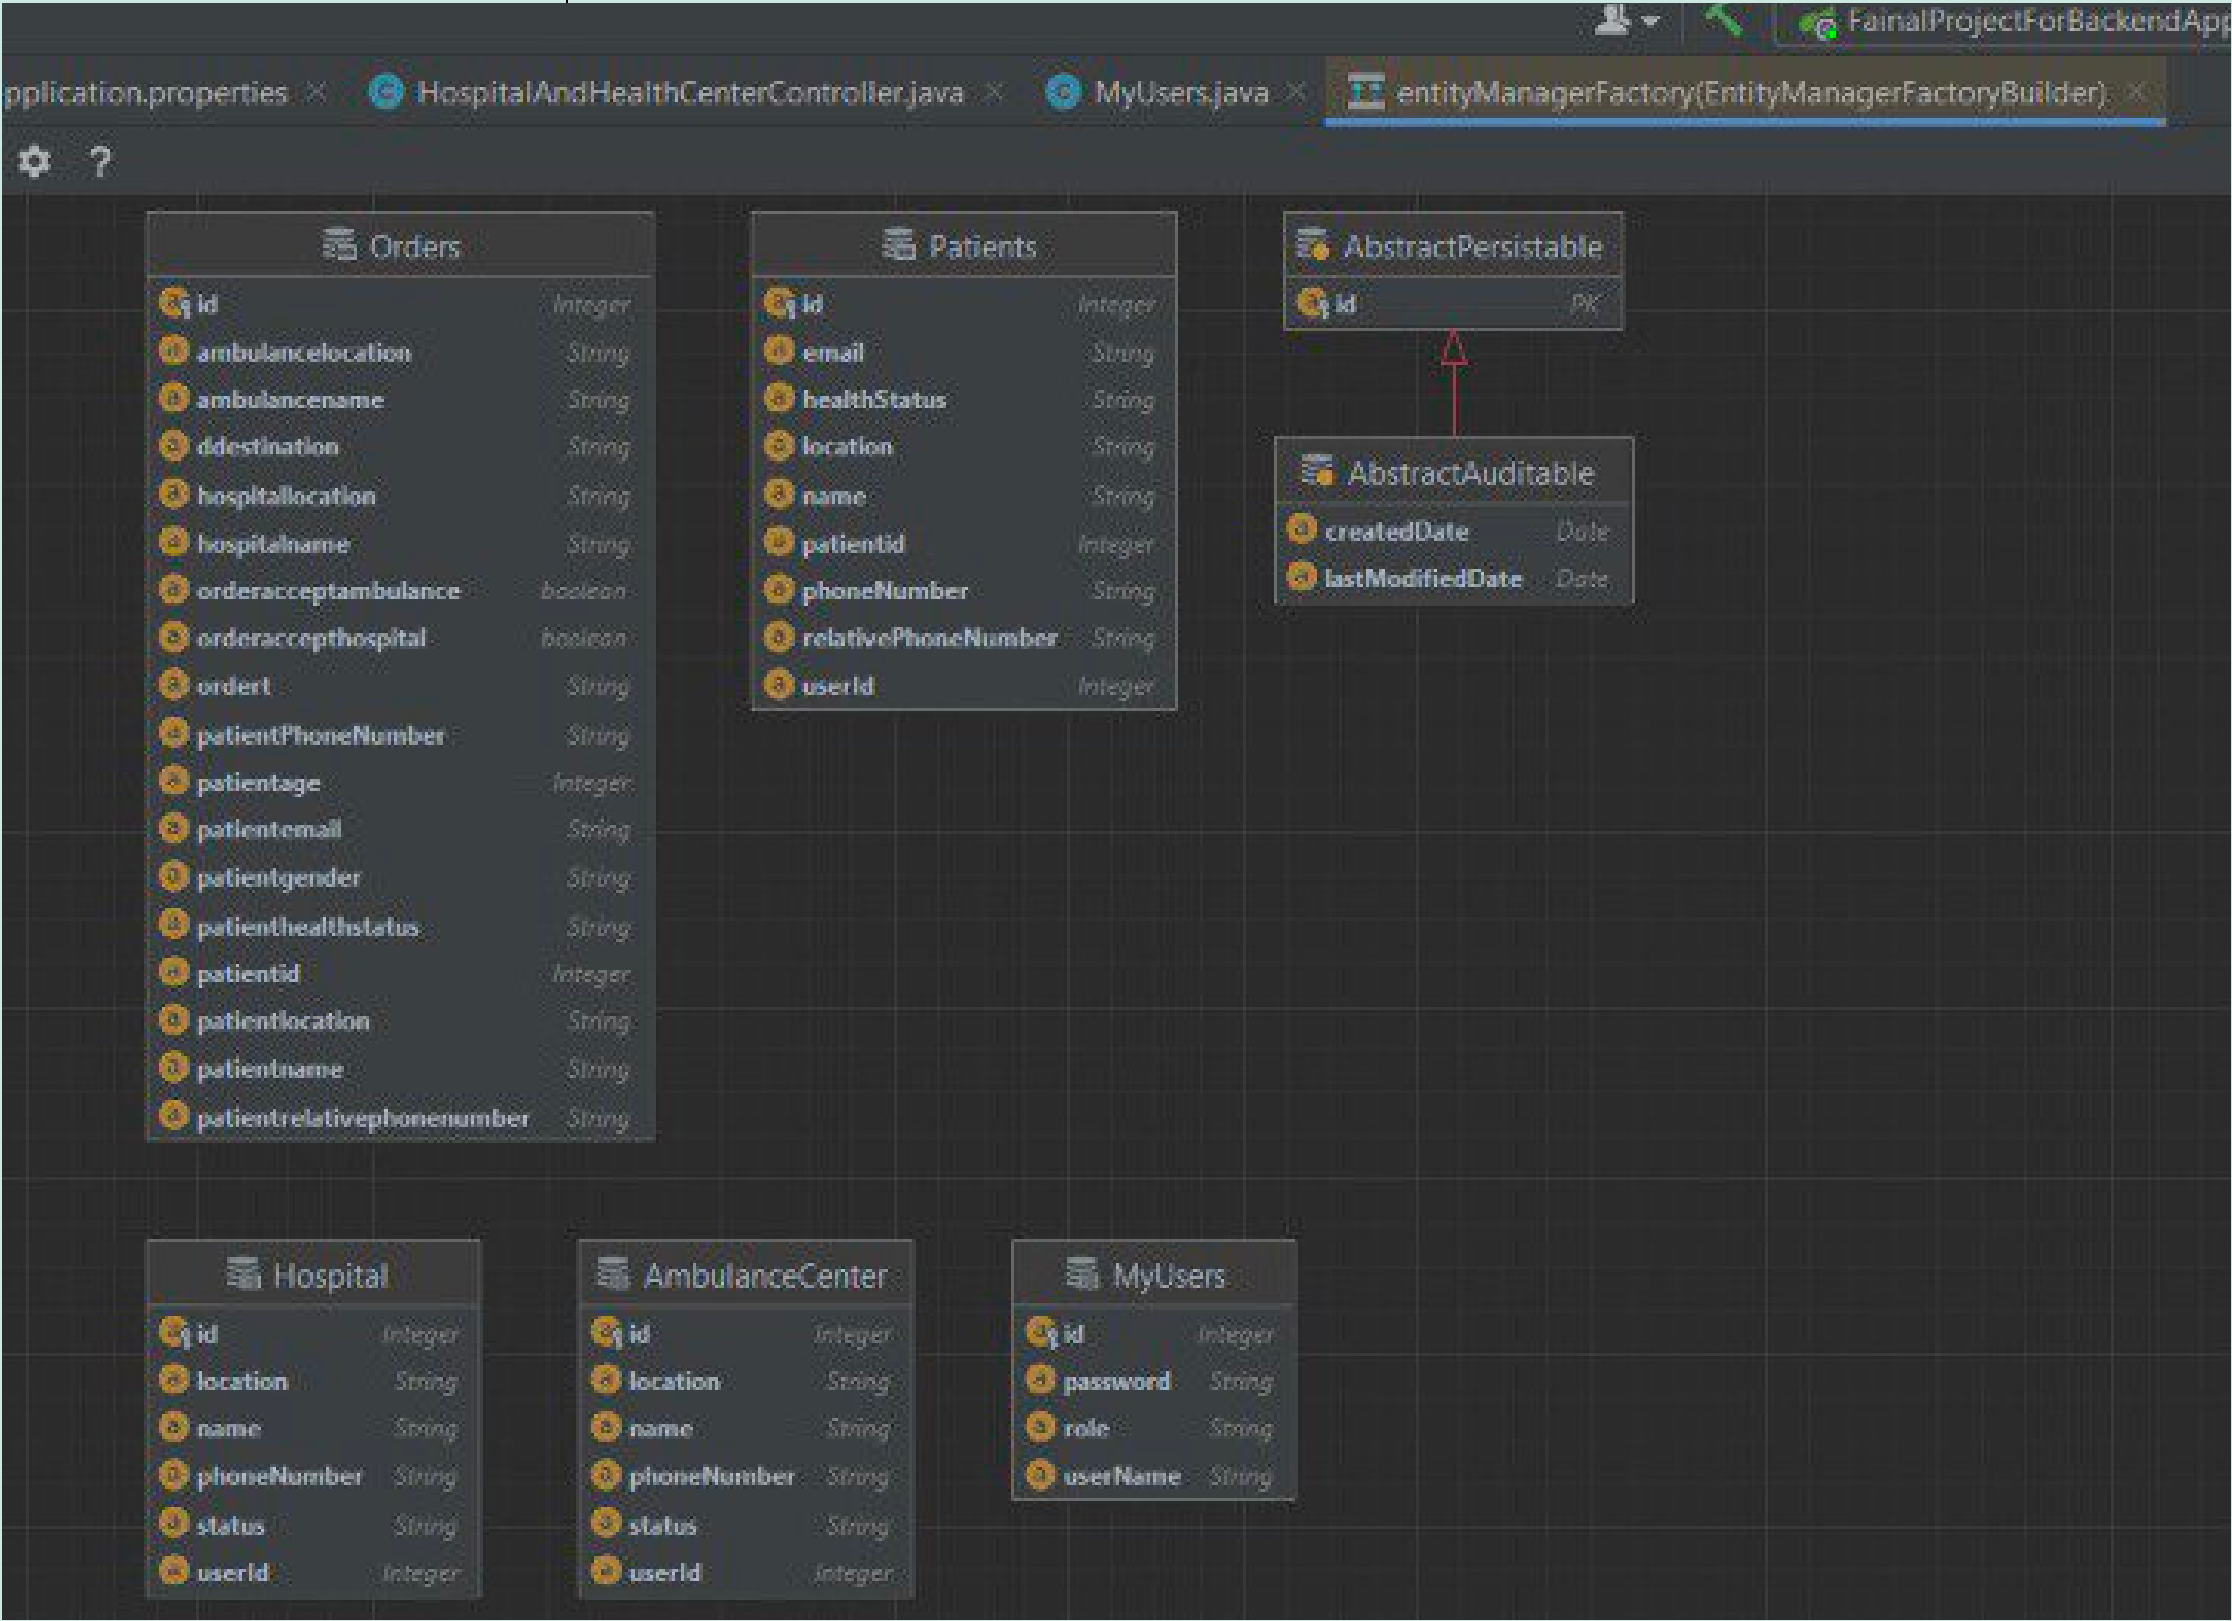

We need a page in case of emergency, in which we do not need to log in

What is the basic information that must be available on the home page?

Create an innovative way to register and complete the application and follow-up and evaluation methods
